

Temperature Controller

**PID controller, self optimizing,
with Fuzzy Logic**

Electronic Temperature Measurement

96 mm x 96 mm • Model CF1L

Areas of application

for control tasks in

- Process and procedure technology
- Plant construction
- Plastic technology and processing
- Ventilation and air conditioning technology

Features

• Control characteristic

- PID / PD controller, self optimizing
- two-step controller (ON/OFF)
- three-step controller (heating/cooling)
- three-step controller (Servo ON/OFF)

• Multi-function input

- thermocouples, resistance thermometers
- current and voltage signals

• Control output

- relay
- logic level
- continuous, 4 ... 20 mA

• Displays

- each one display for process value and setting value
- LED display, 4-digit
- switchable for °C or °F
- display for parameter memory

• Alarm output

- max. four alarm contacts
- setable switching logic, also with stand-by function

Options

- retransmission output
- heater burnout alarm
- loop monitoring
- serial communication
- remote setting
- parameter memory
- transmitter supply

Other features

- self optimizing
- self monitoring
- sensor monitoring
- sensor correction
- cold junction compensation

Description

Digital temperature controller with fuzzy logic for controlling, displaying and monitoring temperature signals.

All types of commonly used temperature sensors and standard signals can be connected to the multi-function input.

The control parameters can be set over wide ranges. Self optimizing parameter setting which can operate with fuzzy logic, as well, may also be brought in. This feature enables an optimal self setting of the controller.

Multiple options render this controller suitable for an extremely wide range of applications, e.g. monitoring control variables (heater burnout alarm), three-step control (heating/cooling), remote setting or connection to a computer by means of a serial interface.

At no extra cost the control output can be provided to choice as relay (for slow control operations), logic level (for fast control operations) or as continuous output 4 ... 20 mA. Optional alarm outputs for monitoring functions.

One alarm output is part of the standard version, optionally available are up to four alarm outputs.

Various monitoring functions can be realised with these outputs. These controllers have been designed for switch panel mounting.

Specification

Model CF1L

Input: setable (multi-function input), measuring span setable

				max. Measuring range ¹⁾	Resolution
RTDs	Pt 100	DIN IEC 751	-199.9 ... + 850.0 °C	-199.9 ... + 999.9 °F	0.1 °C / 0.1 °F
			-200 ... + 850 °C	-320 ... + 1560 °F	1 °C / 1 °F
Thermocouples	JPt 100	JIS C 1606	-199.9 ... + 500.0 °C	-199.9 ... + 900.0 °F	0.1 °C / 0.1 °F
	Type K, NiCr-Ni	DIN IEC 584	-200 ... + 1370 °C	-320 ... + 2500 °F	1 °C / 1 °F
	Type J, Fe-CuNi	DIN IEC 584	-200 ... + 1000 °C	-320 ... + 1800 °F	1 °C / 1 °F
	Type T, Cu-CuNi	DIN IEC 584	-199.9 ... + 400.0 °C	-199.9 ... + 750.0 °F	0.1 °C / 0.1 °F
	Type E, NiCr-CuNi	DIN IEC 584	0 ... + 1000 °C	0 ... + 1800 °F	1 °C / 1 °F
	Type N, NiCrSi-NiSi	DIN IEC 584	0 ... + 1300 °C	0 ... + 2300 °F	1 °C / 1 °F
	Type R, PtRh-Pt	DIN IEC 584	0 ... + 1760 °C	0 ... + 3200 °F	1 °C / 1 °F
	Type S, PtRh-Pt	DIN IEC 584	0 ... + 1760 °C	0 ... + 3200 °F	1 °C / 1 °F
	Type B, PtRh-PtRh	DIN IEC 584	0 ... + 1820 °C	0 ... + 3300 °F	1 °C / 1 °F
Current input	Type W5, W5Re/We26Re	ASTM E998	0 ... + 2315 °C	0 ... + 4200 °F	1 °C / 1 °F
	0 ... 20 mA		-1999 ... 9999 ²⁾	—	1 ²⁾
	4 ... 20 mA		-1999 ... 9999 ²⁾	—	1 ²⁾
Voltage input	0 ... 1 V		-1999 ... 9999 ²⁾	—	1 ²⁾

1) Switchable display unit °C or °F (DIP switch).

2) Scaling and decimal point freely setable.

Input circuiting

Resistance thermometer	3 wire symmetric, max. permissible connection resistance: 10 Ω each wire
Thermocouple	max. permissible connection resistance: 100 Ω
Current input	input impedance: 50 Ω
Voltage input	input impedance: 1 MΩ

Display	process value: 4-digit, 7-segment LED, red, 14.3 mm high setting value: 4-digit, 7-segment LED, green, 10 mm high memory: 1-digit, 7-segment LED, yellow, 8 mm high (parameter memory) measuring time: 125 ms (8 conversions in a second) divers status indicators
----------------	--

Control characteristic	PD algorithm PID algorithm two-step controller (ON / OFF) optional: three-step controller (heating / cooling) three-step controller (Servo ON / OFF)
-------------------------------	--

Control parameters	control parameter setting ranges, self optimizing setting (Fuzzy Logic) can be brought in, a 7-fold parameter memory is available optionally proportional band: 0.1 ... 99.9 % of end of measuring range integral time: 0 ... 3600 s differential time: 0 ... 3600 s proportional cycle: 0 ... 120 s hysteresis: 0.1 ... 100.0 K
---------------------------	--

Accuracy	± 0.2 % of set measuring span ± 1 digit (restrictions with thermocouples) Type K, Type J, Type T with values < 0 °C : ± 0.4 % of measuring range ± 1 digit Type R and Type S with values < 200 °C : ± 4 K ± 1 digit
-----------------	---

Electrical data	power supply: AC 100 ... 240 V 50 ... 60 Hz, optional: AC/DC 24 V power consumption: approx. 8 VA isolation resistance: ≥ 10 MΩ with DC 500 V isolation voltage: AC 1500 V, 60 s (function groups against each other)
------------------------	--

Electromagnetic compatibility (EMC)

interference emission per EN 55 011 (1991) Group 1 Class A
interference immunity per EN 50 082-2 (1993)

Control output

control output and the optional 2nd control output (heating/cooling) are available independent of each other in 3 different versions, alltimes relay contact (2 contacts, common contact root) with instrument feature three-step controller (Servo ON/OFF)

- relay contact load: AC 250 V, 3 A (ohmic load)
 AC 250 V, 1 A (inductive load, cos φ = 0.4)
- logic level DC 0 / 12 V max. 40 mA (short circuit-proof)
 for solid state relay
- analogue current signal 4 ... 20 mA (load max. 550 Ω)

Alarm output

one alarm output is part of the standard version, optionally available are up to four alarm outputs, alarm output 3 and 4 have a common contact root

relay contact	load: AC 250 V, 3 A (ohmic load) AC 250 V, 1 A (inductive load, cos φ = 0.4)
switching logic	5 different versions setable, to some extent also with stand-by function hysteresis setable: 0.1 ... 100.0 K

Loop alarm

available instead alarm output 2

relay contact	load: AC 250 V, 3 A (ohmic load) AC 250 V, 1 A (inductive load, cos φ = 0.4)
---------------	---

Heater burnout alarm

(not available with control output in analogue current signal 4 ... 20 mA), for 1 phase or 3 phase systems, max. 20 A or 50 A, current converter is supplied with controller

relay contact	load: AC 250 V, 3 A (ohmic load) AC 250 V, 1 A (inductive load, cos φ = 0.4)
	hysteresis setable: 0.1 ... 100.0 K

Retransmission output

0 ... 20 mA (load max. 550 Ω)
4 ... 20 mA (load max. 550 Ω)
0 ... 1 V (load min. 100 kΩ)
1 ... 5 V (load min. 100 kΩ)

Transmitter supply

DC 24 V, max. 30 mA

Serial interface

RS 232-C
RS 485

Remote setting

0 ... 20 mA (input impedance 50 Ω)
4 ... 20 mA (input impedance 50 Ω)
0 ... 1 V (input impedance 1 MΩ)
1 ... 5 V (input impedance 1 MΩ)

Parameter memory

7-fold, the control parameters as well as all other configuration data can be stored

Ambient conditions

ambient temperature: 0 ... +50 °C
storage temperature: -20 ... +50 °C
humidity: 35 ... 85 % relative humidity, noncondensing

Case for switch panel mounting 96 mm x 96 mm

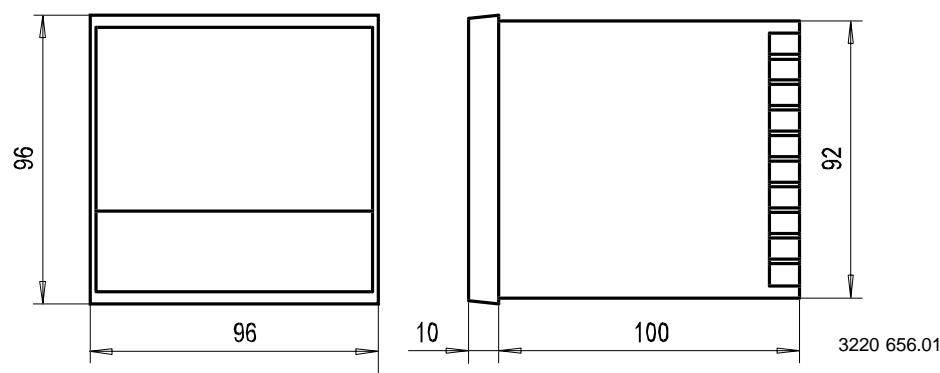

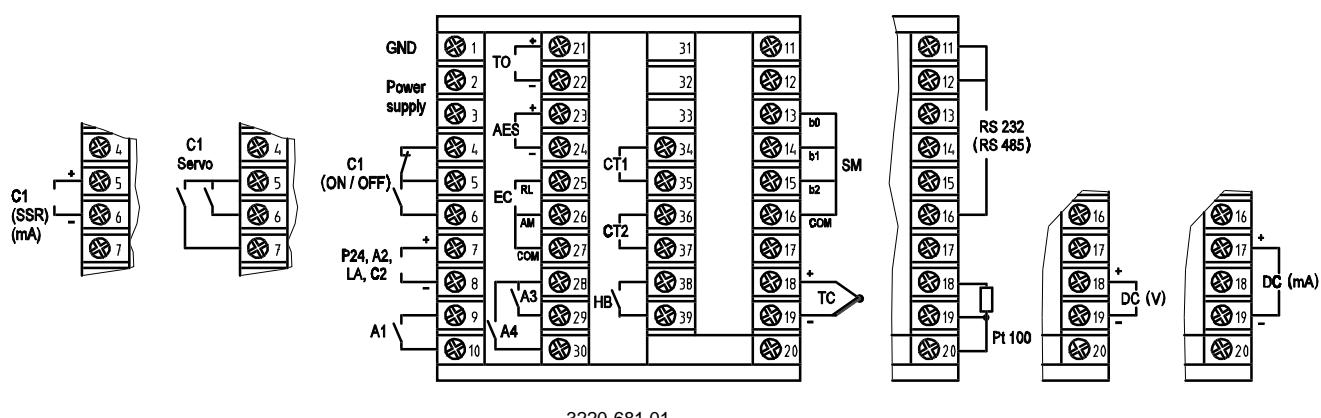

dimensions: 96 mm x 96 mm x 110 mm (W x H x D)
case material: polycarbonate, flame resistant
operation: key pad
colour: black
ingress protection: panel front IP 50 (IEC 529 / EN 60 529)
mounting: screw brackets, for switch panel thickness up to 15 mm
weight: approx. 500 g

Other features

Self monitoring	automatic execution of initial test after connection to power supply, thereafter monitoring due to internal malfunction
Sensor monitoring	optical signalling of sensor burnout and sensor short circuiting
Sensor correction	setable
Cold junction compensation	± 1 K in ambient temperature range 0 ... 50 °C

Further options

- ingress protection of panel front IP 54 (additional seal)
- terminal cover for additional protection

Dimensions in mm**Panel cutout in mm****Designation of terminal connectors**

3220 681.01

Legend:
